

Case Study: Rosland Senior Campus

Located in urban Chicago, IL, Rosland Senior Campus is planned to include 79,174 GSF of new construction, with 60 Independent Living residences, 10 grand-family apartments, and a 7,000 GSF senior center (in addition to the 124 existing Assisted Living residences). The project will engage the street while hiding the parking in the rear; and will partner with the City of Chicago, which plans to operate a senior center that includes a large multi-purpose room, a library and craft space, computer lab, fitness and aerobics room, and warming kitchen.
